Voyager Series

GIG BAG FOR VOYAGER

Manufactured with deep cambered fiberglass reinforced polyester, aluminum or a copper bowl, the construction results in extremely light weight and advanced performance features.

The design of the friction clutch mechanism renders the pedal action exceptionally light and the uniquely designed spring system ensures smooth pedal action over the full range of almost one octave.

Hand Hammered Copper:

20" (50 cm) Ref. VI20DKH

23" (60 cm) Ref. VI23DKH

GRAND SYMPHONIC TIMPANI

Bergerault Grand Symphonic Timpani are available with parabolic and cambered bowls . Both shapes are manufactured from a single seamless sheet of copper with the same proprietary spinning process wich guarantees the bowls are freely suspended with no mechanical connection tlo the timpani frame. The result is long and clear resonant sound, with unbelievable pitch clarity.

Hand Hammered Copper:

Cambered Bowl/Parabolic Bowl

20'' (50 cm) Ref. GP20DKH/GS20KH

23'' (60 cm) Ref. GP23DKH/GS23KH

GRAND PROFESSIONAL TIMPANI

The Bergerault Grand Professional timpani balanced action pedal tuning mechanism timpani are manufactured with CNC machining equipment to very precise tolerances.

The resulting pedal mechanism is silent and smooth facilitating extremely accurate tuning.

Both parabolic and cambered seamless one piece copper bowls are manufactured with a proprietary spinning process instead of the pressed bowl method. This process guarantees the bowls have a uniform thickness and extraordinary tone and response. The one piece copper bowls are manufactured with a proprietary spinning process instead of the press pressed bowl method. This process guarantees the bowls have a uniform thickness and extraordinary tone and response. The one piece bowls are freely suspended in the timpani frame and special attention has been paid to the profile of the bearing edge which is reinforced for extended durability and tuning stability.

This combination of advanced features provides a marvelous musical result: clear and long sustain with full, resonant projection at all volumes.

Tuning gauges will accommodate traditional or German playing style. The position of the tuning gauge is selected when the timpani are ordered

Bowl Ø 22.5" (57 cm)

TIMPANI HEAD

Remo Renaissance Timpani Heads boast a warm, dark, focused sound with full-range projection. Combining the look and feel of calfskin with superb tonality and consistency.

Low Aluminum insert rings accommodated early hand screw drums allowing the tuning handle to reach the receiver. The aluminum insert corrected the rusting that occurred over time from the raw steel insert rings as supplied by some early Timpani drums.
